

# THE EMPRESS EXPRESS

VOLUME XXIII No. 3

EMPRESS, ALTA. THURSDAY, June 13th, 1935

Price: \$2.00 Per Year.

## United Church

Sunday School, 10:30 a.m.  
Church Service, 11:30 a.m.  
Wainfleet, 2:00 p.m.  
Mayfield, 4:00 p.m.  
Rev. A. J. Lew, B.A., Pastor

### Child Drinks Lye

A small child was brought here from Praelate on Tuesday night in serious condition and suffering much pain. The little fellow had drunk some lye which his mother had left mixed for use on a window sill. Parents should be more than cautious where little people are around, to make sure that such things, of which they do not know the danger, are beyond their reach. Also, it will be found that most containers of articles of this nature have the antidote, in case of accidents, printed on the outside. Acquaint yourselves with it.

Veterinary Kerr, of Oyen, arrived in town this week for T.B. testing of local milk cows.

## Big Social Credit Meeting To be Held on Monday

On Monday evening, June 17, arrangements have been made for the holding of a big Social Credit Meeting in the local theatre. The main speaker will be Mr. F. Anderson, of Calgary, and the four Social Credit nominees for the Empire constituency: Messrs R. Knick, A. Zeigler, I. Atkinson and D. Lush, will give short addresses. Previous to the evening meeting, a baseball game has been arranged between Leader and Barstall. The game commences at 6:15 sharp.

### Holds Successful Meetings

D. Lush arrived back on Monday from holding a number of Social Credit meetings west. He reports good attendance and interest at all meetings.

J. Sharp, of Calgary, and a crew are here painting the grain elevator of the Wheat Pool.

## Notice

The Council on the recommendation of the Department of Health wishes to draw to the attention of the householders of the Village of Empress that many all-too-common practices are anything but clean and sanitary, and to put it mildly, are filthy.

It has been noticed on many occasions that slops and wash water have been disposed of by opening the back door and throwing them out. Other citizens have disposed of the contents of indoor toilets in this fashion or in a manner equally reprehensible, by throwing it on the ash pile.

Human excreta, slops and wash water may freeze in the winter time and, except for being unsightly and a filthy practice, may not endanger health at that time out, or melting in the spring; will soak into the ground, and besides being a very unhealthy place for children and even adults, is an ideal place for flies and other vermin to breed during the summer and gives origin to offensive odors.

ASH PILES ARE NOT FOR SEWAGE DISPOSAL. Kitchen slops, wash water, human excreta, or filth in any form; neither will ashes effectively disinfect or deodorize such mixture or refuse. The cans can be stored in covered boxes or tight receptacles of any kind.

Cess-pools can easily be dug in this village cheaply and properly installed and covered. These will take care of the ordinary household waste for years without attention. If this minor expense cannot be afforded for the sake of the health of yourself and others, then the depth of the outdoor lavatory is a far healthier and safer means of disposal than the backyard ash pile, and every respectable citizen keeps his toilet as clean and fly proof as possible.

Surely it is not necessary for the health officer to interview each offending householder, ordinary decency and good citizenship should be sufficient to warrant the maintenance of clean, healthy backyards and lawns. A source of pride to yourself and an assurance of better health for yourselves and your neighbors.

THE COUNCIL,  
Village of Empress.

A. Carr, of Barstall, was a visitor in town Saturday.

## Hazing is Expensive To Alberta University

Edmonton, Alta.—While the hazing of freshmen at Alberta University, will in all probability be curtailed rigidly in future owing to the settlement out of court by the government for \$28,228 in payment of a claim of injury inflicted on a student during initiation, the Legislature has passed an enactment under which the University of Alberta will no longer be held liable for damages through actions of the students.

The taxpayers of Alberta will be called upon to pay a total cost of \$50,051.45 because of the severe hazing activities of the university students. In addition to the \$28,228 awarded to the Powlett family of Calgary in settlement of their claim for damages, the law costs of the Government and expenses of witnesses brought the total cost to the university to over \$50,000.

## Mrs. Mary Matz

Mrs. Mary Matz, 73, passed away at her home at 208 Fifth Street, southeast, succumbing to a paralytic stroke, the first having been suffered about a week before her death. Mrs. Domelski was born in Posen, Poland, July 14, 1862 and arrived in this country with her parents at the age of 16. The family lived in St. Paul several years, later moving to Ivanhoe, and then to Empress, and later to Little Falls. Her marriage to John Matz took place at St. Adalbert's church, May 8, 1883.

Surviving are Mr. Matz and the following sons and daughters: Mrs. Frank Pawlak, Joseph and William Matz, Empress; Rev. Francis J. Matz, pastor of All Saints church, Minneapolis; Rev. Max J. Matz, pastor of St. John's church in New Brighton and national chaplain of the Veterans of Foreign Wars; Sister M. Brouillette, principal of St. Constand school, Detroit, Mich.; Sister M. Frances Clare, principal of All Saints school, Sister M. Maximilia, eighth grade teacher at All Saints school, Minneapolis; Mrs. Arthur Schmidt, Elkhart, Mich., and Mrs. Phillip Tykwin, Little Falls. There are 10 grandchildren. Michael Domelski of Chicago and Mrs. Frank Skudlaski of St. Paul are brother and sister of Mrs. Matz.

Funeral services were held Monday morning at 9 o'clock at St. Adalbert's church. A requiem high mass was sung by Rev. Francis J. Matz, the eldest son, and low masses were said at the side altars by Rev. Max J. Matz, youngest son, and Rev. S. Bujalski, pastor of St. Adalbert's church. Priests in the sanctuary were Rev. John Musial and Rev. J. J. Wessendorf. Church music was furnished by the choir of All Saints church in Minneapolis.—com

## Accidental Death of Child

The tragic accidental death of a child south of the river is reported. This little person was found dead in the barn. He had clambered above the horse manger, his head was caught by the upper part of a window frame and the lower part of his neck by a beam. Missed by his mother, discovery was made when the barn doors were found slightly open.

The Western Stock Growers' Association are holding an important meeting at Medicine Hat, in the Park Hall on June 14 and 15.

## A Welcome Rain

Following windy and cloudy weather on Wednesday, this district was visited by good rainfall overnight, which will help the crops considerably at this juncture. While crops were not suffering, moisture was needed if a set-back was not to occur. It is to be hoped that this is a presage of further rainfall.

## Bindless Nctes

[Hold over from last week]

Messrs. Wallace Gallup and Ted Hall, went to Abbey, Sask., last Saturday.

Mr. and Mrs. Gordon Cameron and Mrs. H. McDonald spent the 24th of May, in Medicine Hat. They were accompanied back by Mrs. Cameron's sister, Miss Lydia Job.

Mr. Walter Peacock is spending a few days with his sister, Mrs. A. Donovan.

Mrs. Dorothy Gallup has returned from a visit with her brother, Mrs. Mark Cheneau, Rocky Mountain House, Alta.

Messrs. R. Hall and S. Fieldberg, made a business trip to Calgary, this week.

## PLAY BY YOUNG PEOPLE'S CLUB OF SOCIAL PLAINS

The Social Plains Young People's Club, presented a play entitled, "Eyes of Love" in the Bindless Hall, on Friday, May 31st, which was greatly enjoyed. The hall was filled to capacity despite the fact that the weather was uncertain. The play was followed by a dance, the music being supplied by Messrs. McCune, Fieldberg and Jones. Mr. and Mrs. McCune, of Empress, assisted with the making-up of characters. The cast of characters was as follows: Carolina, negro servant

...Blanche Tucker  
Gailly, an adopted daughter  
...Helen Hart  
Reeta, a two-faced friend  
...Kay Demorest  
Burt Wade, Reeta's brother  
...Willie McEnnam  
Mrs. Barry, Gailly's foster mother  
...Laura Barrow  
Lora, a lively housemaid  
...Ethel Moore  
Clark, a busy butler  
...Allan Phillips  
Judge Barry, Gailly's foster father  
...Frank Phillips  
Royal Manton, Burt's rival  
...Douglas Silverthorne  
Jim Rankin, the manacled man  
...Bill Longridge  
Between acts, Miss Helen Hart sang, "I Love You So."

Silly Symphony, "Foolish Facts" by Allan Phillips, Douglas Silverthorne, Odd Fieldberg. Vocal duet by Miss Edith Kreller.

## St. Mary's Anglican Church

Sunday, June 16:  
Cavendish — 11 a.m., Holy Communion.  
Audley Valley — 2:00 p.m., Evensong and Sermon.  
Mayfield — 4:30 p.m., Evensong and Sermon.  
Empress — 7:30 p.m., Evensong and Sermon.  
J. S. Parke Vicar.

## Bindless Sports Day Will Be On Wednesday, June 26

Owing to other sports days in neighboring towns being billed for June 19, the postponed date for the Bindless Sports Day is now, Wednesday, June 26.

## Grain Board Bill May End The Trading in Futures

Ottawa, June 10.—What constitutes practically a monopoly of interprovincial and export grain trading in Canada is given to the proposed Canadian Grain Board in a bill introduced in the house of commons today by Prime Minister R. B. Bennett. The measure would place all grain elevators in the four western provinces under the exclusive control of the board. The bill is expected to end operations in futures now dealt in on the Winnipeg Grain Exchange. As a result of the understanding between the parties, the bill will go to a house committee for consideration. The suggestion came from the Liberal leader, Mackenzie King, and the prime minister acquiesced, reserving his decision as to whether it would be one of the regular committees or one specially appointed.

## May Use Airplane

Possibility of the use of airplanes for scattering of poison bait for grasshoppers is being investigated by Hon. F. S. Grisdale, Minister of Agriculture. Hoppers are now beginning to hatch, and farmers are urged to be on the lookout for them and to report to their nearest authority at the earliest possible moment.

An exchange says, "that if it was not for the talk on Social Credit, one would not know that there is two elections near at hand."

and Miss Helen Fowle. These extras were much enjoyed by the audience.

**A NEW  
BETTER  
TIRE  
AT A  
LOWER  
PRICE!**

Prices quoted are for the big, broad-shouldered Goodyear Pathfinder tire—a bargain if there ever was one! No charge for the EXTRA service we render you.

Size 30 x 3 1/2	\$ 6.00	Size 4.75 x 19	\$10.50
Size 4.40 x 21	\$ 8.50	Size 5.00 x 19	\$11.25
Size 4.50 x 21	\$ 9.50	Size 5.00 x 20	\$11.50

Other sizes equally low-priced

**STOREY'S GARAGE**

Phone 17 Empress, Alta.

## BIRTHDAY SALE

Starts Next Week---JUNE 19th to 30th  
We are Celebrating REXALL'S 25th Birthday, with a TEN DAY SALE. Values will be even better than the One Cent Sale. Ask for Our Circulars

**EMPRESS DRUG CO., Ltd.**

We are agents for leading nurseries. Cut Flowers ordered on shortest possible notice.

## JOB PRINTING

Visiting Cards, Business Cards  
Letterheads, Statements, Envelopes, Posters, Auction Sale Posters and Commercial Printing.

Give your next order to the local printers.

**THE EMPRESS EXPRESS**

## Farm Rehabilitation Plan

### Members of Advisory Committee Have Been Appointed

Dr. E. S. Archibald, of the Central experimental farm, will be chairman of the prairie farm rehabilitation advisory committee, it was announced at Ottawa.

Other members of the committee are: Olaf Nylund, Shatinaw, Sask., and Leonard Kool, Morden, Alta., grain growing farmers; P. C. Colquhoun, Maple Creek, Sask., livestock farmer, and R. P. Gilchrist, Wild Horse, Alta., range farmer.

Further committee members are: F. J. Freer, Winnipeg, Manitoba, mortgage companies of Canada; H. P. Alley, Toronto, Canadian Bankers' Association; Dr. W. J. Black, Montreal, Canadian National Railways; E. W. Jones, Calgary, Canadian Pacific Railway; J. H. Ellis, Winnipeg, government of Manitoba; O. S. Longman, Edmonton, government of Alberta; and Prof. A. M. St. Sauton, government of Saskatchewan.

Briggs—"I've lost my new car."  
Griggs—"Why don't you report it to the sheriff?"  
Briggs—"He's the one that took it."

## Mixed Marriages

### Germany May Forbid Marriages Between Gentiles and Jews

Notice that Germany soon may forbid marriages between Gentiles and Jews was given by Julius Streicher, leading Nazi "race" writer, in an address at Nurnberg.

Opening the "Germanic Peoples' Exposition," Streicher announced important public health legislation was coming with "the first step being the official branding of marriages between Aryans and non-Aryans as illegitimate."

"The next move will be to forbid marriages between Germans and Jews altogether," he declared. Streicher charged that every year 100,000 young German girls are "ruined" through entering Jewish homes as servants.

The exposition, opened in connection with Germany's first "healers' festival," purports to show how nature healing can and should supplement medical science, which is considered to be under Jewish domination. Streicher is sponsoring the exposition.

## Transportation By Air

### Everything From Bees To Lions Now Being Carried

Livestock by air is the latest form of transportation. An official of Imperial Airways says that more and more peligrant animals, such as dogs and cats, are being sent over to the continent by air. There is a growing traffic in the shipment of small day-old chicks from poultry farms in England, while from the empire tropical fish tanks are now consigned to London by air. Not long ago Imperial Airways received a crate of live locusts from Africa, intended for experiments in this country with a view to the extermination of the locust plague by chemical means. The livestock handled also includes rabbits, small bears, mice, rattlesnakes, monkeys, lizards and bees. A fully grown lion was brought over from the continent in a special cage, while on another occasion the freight compartment of a machine was arranged as a horse box, so as to fly over a valuable performing horse from Paris.

## A Simple System

Travelers on the Czechoslovakian Government railways can now communicate with the train attendants through any of 17 languages. This is done by means of a series of numbered questions and answers. The traveler points to the question in his own language. The attendant consults the same numbered questions in Czech and points to the answer again read by the traveler in his own tongue.

## A Real Relic

Believed to be the only one of its kind in Canada, a wooden pistol, or "cow catcher," used on Canadian frontiers of bygone days, has been donated to the Canadian Railroad Historical Association, Montreal. It is expected this relic of pioneer railway days will be prominently displayed at the Canadian Railway Centennial exposition to be held in July, 1936.

Venus, not Mars, is the most probable home of life on other planets, according to latest reports from scientists and astronomers, who have estimated that the temperature of Mars drops to at least 40 below zero at night.

## HOLLAND'S BIGGEST BRIDGE IN COURSE OF CONSTRUCTION

The first part of the superstructure of the new bridge over the Hollandsch Diep is shown being conveyed by tug boats from the works to its destination. When completed this bridge will be the largest in Holland.

## First Printer Of France

### Monument Is To Be Erected To His Memory

William Fichet, the first printer of France, who was born 502 years ago in the Alpine village of Petit Bornand, will have a statue erected to him at his birthplace.

Fichet was not the actual inventor of the printing press, but was the first to proclaim Gutenberg as the discoverer of the "art of printing with movable characters."

Fichet recognized the merit of Gutenberg's invention and introduced it in France, where in three years it was popularized. The first French printing shop was set up in the Sorbonne, and from this press came the first book ever to be printed in France. This book, dated 1470, was a collection of letters by Gasparin Pergamo. The second volume, dated the same year, was a textbook in rhetoric composed by Fichet himself. Three Germans, who had learned their trade under Gutenberg, aided Fichet.

Within two years printing establishments had been set up in some other French cities and within a decade there were 60 printing shops in Paris alone.

Today the printers and master-printers of France, headed by Dr. Sebastian Chartier of the Sorbonne, are sponsoring a movement to erect a monument to William Fichet, who gained fame not only as the first printer, but as author, rector of the Sorbonne, ambassador to Italy, and finally as chamberlain to Pope Sixtus IV.

## New Idea For Embroidery

### Specially Treated Poplar Tree Leaves Used By Cuban Girl

Poplar tree leaves, treated to remove the leafy structure and leave only the fine network, are used as a base for embroidery by a Cuban girl says Popular Mechanics.

The leaf is cut from the tree, those that have fallen being for from 15 to 20 days, the water being changed every day. This softens the green leafy structure so that it may be removed with a soft brush, care being taken not to break the fine network of veins of the leaf.

The design is then embroidered in regular stitches with silk thread of various colors. In such parts as the petals or flowers, one color is frequently put over another, in part, at least, produce a raised effect as in other embroidery. The leaf is frequently finished with a small silk flower placed at the point where the stem joins the leaf.

## A Sensible View

The undoubted border between Canada and the United States has been a fine thing. So fine a thing it has been that until now few have examined the nature of the matter. When looked at squarely it does seem that a nation of 24,000,000 people might feel reasonably secure in doing without fortresses as against a small neighbor state of 10,000,000. And a small state alongside a mighty nation could wisely decide not to go into the fort and gun business, which is big a neighbor—Toronto Star.

"Can you drive with one hand?" asked the girl in a gentle voice.  
"Yes, but I can," he answered eagerly.  
"Then have an apple," she said sweetly.

## Faithful Dog Mourned

### Was Famed Throughout Japan As Example Of Devotion

A dog has been buried at Tokio, Japan, by 10 priests, according to the rites of Buddhism, and mourned by the whole nation.

Hachiko, the dog, belonged to a Dr. Hidemasa Ueno, and used to accompany his master to the station at Shibuya when he went to work in the mornings, and met him in the evenings when he came home. Eleven years ago Dr. Ueno died, and was buried in Aoyama Cemetery. Every day since then Hachiko went to the station to meet his master, who never came. He became famed throughout Japan as an example of devotion. Schoolbooks told his story; he appeared on the screen, and last year a bronze statue of him was erected outside the station where he kept his lonely vigil for so long.

One day Hachiko was found lying ill. The efforts of five veterinary surgeons were unavailing and he died of heart failure. His master's widow attended his funeral, and 25 wreaths, 200 bunches of flowers and innumerable telegrams and letters of condolence testified to the place he held in the nation's heart. Hachiko lies in a little grave at the side of his master.

## A Big Investment

### Canada's Hospitals With Equipment Are Worth Millions

The hospital field in Canada represents a big investment in land, buildings and equipment. Its 92,000 hospitals, beds, require an annual maintenance budget of almost \$51,000,000. There are 482 general hospitals with well equipped X-ray departments, and 221 hospitals with good physical therapy departments. It costs from \$3,000 to \$45,000 per bed to build a modern, up-to-date hospital; it costs approximately \$300 to adequately equip a private room; X-ray equipment costs from \$2,000 to \$15,000 or more, and physiotherapy equipment costs from \$1,000 up. The Canadian Hospital.

Voice (over telephone): "Are you the game warden?"  
Game Warden: "Yes, ma'am."  
Voice: "Well, I am so thankful I have the right person at last! Would you mind suggesting some games suitable for a children's party?"

## FANCFUL FABLES

## Cattle Export To United States

### Important Reciprocal Agreement Between Canada And The United States

As a result of the notable progress made in recent years in both Canada and the United States in the eradication of bovine tuberculosis, the United States government has decided, as from May 15th, to admit all cattle imported from Canada from areas in which the tuberculosis infection has been reduced to one-half of one per cent, or less, providing the exporter has a certificate signed by a Veterinary Inspector of the Health of Animals Branch, Dominion Department of Agriculture, stating the cattle are from such an area.

The Dominion government has also agreed a similar arrangement for cattle imported into Canada from the United States. The reciprocal agreement is to apply to areas in which the element of infection has been reduced to one-half of one per cent for three years, and for six years in areas where the infection is between 0.2 per cent, or less. At the expiration of these periods restriction in the areas will be required in both countries.

This new agreement will be of much greater benefit to Canada than to the United States. In the fiscal year ended March 31, 1934, the total cattle exports from the Dominion to the United States numbered 2,732, while the imports from the United States to the Dominion were only 288. In 1929 Canada shipped a total of 232,271 head of cattle to buyers in the United States and only imported from that country 422. While cattle exports have been a steadily falling off in the cattle exports to the United States in the past four years, due to the imposition of a tariff ranging from 2 1/2 to 3 cents per pound on the beef, there has been a sharp increase in the Canadian exports recently due to the depletion of cattle as a result of the severe drought existing over a large area of the United States, particularly in the Middle West area.

At present an exporter in Canada shipping cattle to the United States is required, even from restricted areas where the tuberculosis infection is reduced to one-half of one per cent, or less, to have the cattle tested by a veterinary inspector of the Health of Animals Branch or pay an accredited veterinarian to have them tested. Under the new agreement all he will require is a certificate from a government veterinary inspector.

## Builds Model Seadrome

### Work Of Regina Boy Done With Crude Equipment

A floating seadrome, modelled after the fictional "FPI," and named the "FPI," was seen by the public for the first time in Regina during the Regina Boy Fair.

The model, complete with floats, rope ladders, scapholds, search lights, landing field and towers, is the work of W. Ashton, Suite 8 Maple Leaf block.

Ashton built the seadrome without plans and with few instruments. Chief among them were a razor blade, a hack-saw blade and a pen-knife. It was modelled after the style of one shown in the British film, "FPI," and measures about four by two and one-half feet. It weighs 10 pounds and is built mainly of wood.

Twelve cylindrical floats support it in water and specially-made anchors hold it secure. Thirty-five red, white and green lights cover it. It visions the future when floating airports may dot the oceans to enable trans-oceanic planes to stop for refuelling and repairs.

## The Friendly Enemy

### Wanted Gift To Be Conducted On Equal Terms

Sir Alfred Pickford, deputy chief of England's War Scouts, tells his one.

"During the war with the Maoris, New Zealand aborigines, the Maori chief noticed that the fire of the English troops was slackening."

"He sent out a flag of truce and asked why. He was told that the British ammunition was running short."

"The Maoris promptly offered to supply the British with more ammunition, so that they could fight on level terms."

## Monster Egg

Walter Hiles of Welland, Ont., has an egg as big as a goose egg, laid by a white hoghorn hen. The egg measures 7 1/2 inches by 8 1/2 inches and is a double yolk specimen. Mr. Hiles says his precocious hen has laid double yolks before but not quite the same size.

## Reads Like Fiction

### Young School Teacher Becomes Richest Man Of Balkans

Alexander Pokol, once the richest man of the Balkans, who presented King Ferdinand and Queen Marie of Rumania with crown of solid gold, died in complete poverty in Budapest recently.

The story of his life reads like fiction.

Pokol, 45 years ago, was a simple school teacher in the little town of Borpatok, Hungary. Decades later his little district had been a gold mining centre. The gold fever never had died out there. The young schoolmaster seemed immune against the fever until he married a poor peasant's daughter whose only dowry was a gold claim which the family had considered valueless.

Pokol, trusting to his luck, not only invested his whole wages in the exploitation of the claim, but contracted debts with a wealthy grocer to pay the two men whom he had engaged to dig. On the eve of the day on which he had decided to give up, his workmen struck a vein of gold two fingers thick. But fate never gave the poor school teacher had become a millionaire. This was in 1894.

Pokol built himself a magnificent castle on his home town, bought a palace in Budapest and kept a racing stable. Whenever he came into a restaurant, nobody else was permitted to pay a bill. He called in apy musicians and the costliest wines and foods were lavishly served at his expense. The grocer paid him 10,000 Swiss francs. Trusting in a second stroke of good luck, he invested the greater part of this sum in other gold claims. But fate did not smile again upon him.

In a second rate hotel of Budapest, whither he had come to seek relief from illness, Pokol, once one of the richest men throughout the Balkans, died in complete poverty at 71.

## Praise For Crossed Hands

### General Jan Smuts Has A Good Word To Say For Haplogy

"I have said before and I repeat here, that among the men I have known some of the best have been kings," General Jan Smuts, South African statesman, wrote in the London Spectator.

"You may go far among presidents and monarchs to find humans like them." He refers to encounters with King Victor of Italy and the late King Albert of Belgium. He also refers, referring to King George, adds: "One never, with the king, has a sense of position, pomp or pomp. The centre of the nation and most successful power that ever existed in history, he himself is simply itself, and that simple self is composed of sympathy and intuitive understanding of others which are real sources of strength."

## Liberty Endangered

### Organizers Of Efficiency Invading The Rights Of The People

We hear, in various forms of "new deals" everywhere, and a "new deal" seems generally to mean ordering people about. Liberty is everywhere being subordinated to efficiency or to what claims to be efficiency; and the movement is so strong that we are likely to have to learn by the stinging rod of experience rather than by the more comfortable feel of abstract discussion, how far it is wise to let the organizers of efficiency invade liberty—Lord Hugh Cecil.

## Know Only One System

A dealer in South Georgia carried Rastus Johnson during the spring and summer so that Rastus could make his cotton crop. It turned out to be a good year and Rastus had enough money to pay his account at the store and still have some left over.

After paying his account, he went across the street and bought quite a lot of goods for cash. The dealer who had given Rastus so much credit learned of this and the next time he saw him said: "Rastus, I carried you all spring and summer, and now you make my cotton crop. It turns out to be a good year and Rastus had enough money to pay his account at the store and still have some left over."

WORLD HAPPENINGS  
BRIEFLY TOLD

Glyn Bowden of the Brandon Exporter was chosen president of the Ontario-Quebec Newspaper Circulation Managers' Association after a two-day conference.

Overwhelming support was voted for the League of Nations in the peace ballot conducted in Britain. It was announced that a total of 8,008,703 votes, 7,775,850 were in favor of the league.

Bereshburg, British Columbia—named for the governor-general—is the newest post office address in Canada. It is located in section 2, township 17, electoral district of Cariboo, B.C.

London buses, subways and street cars carried 46,000,000 passengers in the first four days of the week, opening the royal jubilee celebrations, easily beating any previous records.

Treasures once the property of the Russian Imperial family and valued at \$50,000 were reported stolen from the Russian Imperial Art Treasures, Inc., in Rockefeller Centre by an unnamed gunman.

Martin Mooney, reporter for the New York American, was sentenced to 30 days in the workhouse and fined \$250 for contempt of court in refusing to tell a grand jury where he obtained information for a series of newspaper articles on the police racket.

Lenders blinked in surprise at the sight of snow falling in the British capital in the middle of May. The unseasonable snowfall was accompanied by a cold wind which brought to a chilling 42 degrees the balmy springlike weather that had been marked by a temperature of 77 on May 6, when the royal jubilee was officially opened.

City of Calgary aldermen will be granted remuneration for their services, starting December 1, 1915. They will be paid at the rate of \$5 per day for attendance at standing committees, to a maximum of \$250 a year. The vote for pay was four to four. The electorate since 1912 has defeated six plebiscites to pay aldermen.

## Advances New Theory

**Fruit Eater Thinks Eve's Apple May Have Been Peach**

It now appears that Eve's "apple" which started the world's first family trouble, was a peach. Such was the theory advanced by Lloyd C. Stark, nurseryman of Louisiana, Mo., and authority on fruit origins.

"In ancient days," said the nurseryman, "the Chinese believed eating a certain kind of peach would bring immortality and preserve the body from corruption. The peach tree was the 'Tree of Life' to the Chinese, and it may have been that the apple, eaten by Eve in the Garden of Eden, after all was the Persian apple, or, as it is known to day, a peach."

## The Fireproof Fireman

**Special Asbestos Suit For Brigade In Sheffield, England**

The fireproof fireman has arrived. The Fire Brigade of Sheffield, England, has just taken delivery of a special asbestos suit, which will enable the fireman-wearer to walk with impunity in the fiercest flames. He will be able to effect repairs and salvage work unhampered by the heat. Sheffield is the pioneer city in adopting the suit, which has been subjected to the most vigorous tests. Fire brigades in other parts of the country have been awaiting the outcome of the experiment with great interest.

## Success After Ten Years

**Invents Window That Admits Light And Air But Not Noise**

A new sound-proof window, which admits light and air, but not noise, has been invented by E. T. Falk, chairman of Amalgamated Wireless, Australia.

The design of the window, which has just undergone successful tests, is the outcome of ten years of acoustical experiments by Falk. It employs the principle that most sounds can be reflected or absorbed if certain materials are applied to the surfaces which the sounds are striking.

Misses—This pie is absolutely burnt, Norah. Did you make it according to the instructions in the Cooking Book?"

Norah—"No, ma'am. It's my own creation."

Migration Of The  
Canada Goose

By Maaty F. Miner

Much ink has been used by various writers and authors describing the origin and history of the Jack Miner Bird Sanctuary, but to me the big achievement there has been scarcely mentioned, namely, the catching and tagging of the Canada Goose to study its route of migration in both spring and fall, and find where it nests and raises its young during the summer months.

It was in 1902 and 1903 that Jack Miner conceived the idea of establishing a bird sanctuary, the first of its kind in Canada, if not of the continent. But not until 1904 was work on the sanctuary actually started, as that, as excavations made for ponds, several wing tipped live decoy geese placed on same, being found plentifully around the banks. Ducks and geese, in a short time, found this to be a place of safety. Both the conservationists and shoot-ers were back of the Jack Miner scheme, because the sanctuary, taking nothing from the ducks, constantly built up the hunter's chances one mile away, the bird haven attracting many birds to the country. At the same time the birds became tame, and, what is a great bonus, property where they were unprotected, to fly back to their safety zone and heaven rest of it.

Eventually, the birds commenced congregating in large numbers. Jack Miner had a desire to shoot, but was anxious to protect the birds that had been introduced. He was not a sportsman, but a conservationist. He had, however, caught a duck and wrapped around its leg a piece of aluminum, which was stamped with his own address. This was the first time that a piece of aluminum was used, and, incidentally, the record of sale is the earliest on this continent. Thus, Jack Miner was the pioneer of tagging birds.

A few months later, January 14th, 1910, the duck which had the longest of bearing the first tag was killed by E. W. W. Walton.

Naturally, great enthusiasm was caused, and the problem then confronting the owner of the sanctuary was how to build nets and other contrivances to catch the birds without injuring them, in order that they might be tagged. He had no books or plans to which he could refer, for there was nothing of this kind in existence. So, after attracting the birds to the sanctuary, it fell to the lot of Jack Miner to invent a contrivance for catching the ducks. This he accomplished after many trials, the result being that to-day there are hundreds and hundreds of ducks flying to and fro about the pond and practically the largest migratory waterfowl on the continent. It has been found that catching Canada Geese was a different undertaking compared with catching ducks, though the geese, at this time, were coming to his sanctuary by the hundreds for food and protection, where neither rich nor poor could enter with a gun, to catch one of his tagged birds for purposes was another thing. They came to him near the work, he had arranged for catching ducks. So after a year's constant study he conceived the idea of having two ponds with a canal connecting them covered by a net-work and netting at both ends. It was in 1915 that he caught his first wild Canada Goose to place an aluminum tag on its leg, giving the post office address of the owner of the sanctuary.

Jack Miner is by no means a religious fanatic, but he believes in the simple teachings of Christ and being anxious to make his tagging system complete and fascinating, a short verse of Scripture, such as "Have faith in God," "God is able," and so forth, is stamped on one side of his tag. This was every person who gets one of his tagged birds, get a verse of Scripture, which has more than doubled the interest of his tagging system.

In the spring of 1915 and just before the first Canada Goose was known in the North, he caught and tagged his first Canada Goose. He liberated it again with the big flock from which it had been taken. Interest was aroused in the community as to who would kill and where. No one had even caught one before for tagging purposes, so no one knew where they nested. All that was known was that they went north, and the netter in the most northern point in Canada always reported that "they went still farther north."

However, weeks and months rolled by and, to the surprise of everyone, early in October of the same year, Jack Miner received a letter from the Hudson Bay Company at Moose Factory, dated August 10th, 1915, containing the tag. The goose had been killed by an Indian in unsurveyed territory in the Hudson Bay district. This, naturally, interested the whole country, and with real enthusiasm Jack Miner began to work on the improvement of his goose trap in order to catch some of the hundreds. The next year it proved to be a decided success. Many more geese were trapped and, later on in the season, word was received from different points along the east side of Hudson's and James's Bays and as

Here is two-year-old Willie McManus, who travelled all the way from Glasgow to Canada by himself on the Anchor-Donalson liner Athena.

Willie arrived at Montreal none the worse for his adventure and seeming sorry to say "good-bye" to the Stewards and Stewardesses.

He was photographed at Montreal with his little suitcase just before leaving for Toronto where he will visit his aunt and grandmother who reside on Broadview Avenue, Toronto.

far as Baffin Land, of tagged geese having been shot down. On one occasion the Rev. W. G. Walton, an Anglican missionary, who had spent between 20 and 25 years among the Indians and Eskimos and who had never been out to civilization, came by canoe from Hudson's Bay to Cochrane. Taking the train here in due course arrived at Kingville and the sanctuary. With him he brought a pocketful of tags, each of which bore a passage of Scripture and Jack Miner's post office address. He had collected these from the Indians and Eskimos all the way from Moose Factory, James Bay, along the east coast of Hudson's Bay, and as far north as Baffin Land. The natives had brought them to him for interpretation of the verse of Scripture.

Through these tags, this devoted Christian missionary, together with the Hudson's Bay fur dealers, and the agents of Revillon Freres Fur Company, who have also co-operated to a great extent in collecting them from the natives, a lot of valuable information as to why these birds nest around the shores and islands of Hudson's Bay and Baffin Land instead of along the rivers and streams has been revealed to the civilized world. The geese arrive in that vicinity around the latter part of April and the first of May. The rivers and all fresh water are all frozen over at that season of the year, but the Hudson's Bay is open up by the incoming ocean current and the geese prefer to nest where there is open water.

The tagging system has also revealed where they spend their winters. Each tag bears a date and it has been proven that very few geese which visit the sanctuary in the fall visit in the following spring, as practically all geese bearing fall tags are killed in the Middle States, along the Mississippi (East side), through the Gulf of Mexico, while geese which are tagged in the spring winter along the Atlantic coast, mostly around Narragansett Sound. The geese which spend the winter along the Atlantic seaboard nest in the extreme northerly portion of Hudson's Bay and Baffin Land. When the fall comes and it turns cold, instead of migrating inland, they follow the ocean around by the way of Labrador, Newfoundland, and the New England coast, seaward to Carriacou Sound. But when March and April come, it is too warm in North Carolina for them. The Labrador coast, however, are still frozen over, so they winter there. The geese, therefore, have been proven to be wintering in the extreme north.

Shall hard cooked eggs and cut in halves lengthwise. Remove yolks and mash well. Add to mashed yolks a small amount of soft butter, finely chopped mustard, cucumber pickle, sufficient of the mustard dressing from the pickle to moisten the egg yolks, and salt to taste. Fill egg whites with prepared mixture. Sprinkle lightly with paprika.

## New Offensive Planned

**Grasshoppers Killed In Larvae Stage Would Protect Farms**

A new offensive against grasshoppers that would take attackers to the insects' permanent breeding grounds and prevent the recurring plagues by destroying the insects before they assumed outbreak proportions was favored in a statement issued at Lethbridge by eminent entomologists of Canada and the United States.

The experts, following a six-day conference, reported the program in future would be to search out isolated areas where grasshoppers breed in years of no general infestation and start the poisoning campaign there.

The conference, outcome of appointment last year by the Dominion Government of a committee to draw up a scheme of permanent grasshopper control, felt such a plan would make farms safe from grasshopper plagues and farmers would not be occupied, as in the last two summers, scattering poison bait for weeks on end.

## Explore Uper Stratas

**To Build Rocket That Will Ascend Distance Of 34 Miles**

A Soviet stratosphere committee ordered the construction of a rocket expected to ascend 50 kilometres (about 34 miles) at a speed of 700 metres a second, or more than twice the speed of sound at a temperature of zero centigrade.

The rocket would take up automatic electronic instruments, which, reaching the maximum height would descend by parachutes.

SPECIAL OFFER 10c.  
SPRING FASHION BOOK

For the next two weeks the latest Fashion Book (regular 20c) will be sold at 10c when ordered with a pattern.

## Recipes For This Week

(By Betty Barclay)

## BRAIN SPOON BREAD

1/2 cup corn meal  
2 cups milk  
1/2 cup all-bran  
3 eggs  
1 tablespoon butter  
3 tablespoons baking powder  
3 teaspoons sugar  
1 teaspoon salt  
Stir cornmeal into 1/2 cups milk and bring to a boil. Remove from fire, add all-bran and cool. Add well-beaten eggs, milk, butter, baking powder, sugar and salt. Bake at 400 degrees F. in earthenware pan (8 inch dia.) or pyrex for 25 to 30 minutes.

## STUFFED EGGS

Shall hard cooked eggs and cut in halves lengthwise. Remove yolks and mash well. Add to mashed yolks a small amount of soft butter, finely chopped mustard, cucumber pickle, sufficient of the mustard dressing from the pickle to moisten the egg yolks, and salt to taste. Fill egg whites with prepared mixture. Sprinkle lightly with paprika.

Banff's Famous  
Hot Springs

**Radio-Active Waters Have Acquired A World-Wide Reputation**

Among the chief attractions of Banff, in Banff National Park, Alberta, are the hot sulphur springs which bubble from the side of Sulphur mountain. They are ranked among the most radio-active waters on the North American continent and have acquired a world-wide reputation by reason of their curative properties. These springs were known to the Indians who inhabited the region for generations prior to their discovery by the white man around 1880. There are five chief springs at Banff, namely, the Upper springs, the Kidney springs, the Middle springs, and the Cave and Basin springs.

Development of these springs by the National Parks Service of the Department of the Interior has taken place at the Upper Hot Springs and at the Cave and Basin Springs. The former are located two and a half miles from Banff on the slopes of Sulphur mountain where grasshoppers and pool have been constructed at these springs. The waters of the 60 foot by 30 foot pool have a temperature of 112 degrees Fahrenheit. The bathhouse contains steam rooms, tubs, plungers and hot and cold spray, and rest rooms. There are two swimming pools, with waters of varying temperatures, and dressing rooms for visitors.

## Running Close Race

**Great Britain, Slightly Ahead Of Germany In Wireless Licenses**

Great Britain and Germany are running a hot race for the highest number of wireless licenses. On January 31, according to figures of the International Broadcasting Union, Britain had issued 6,688, 727 licenses to radio fans, while Germany total was 6,453,325. Soviet Russia was a bad third with 2,323,000, and France fourth with 1,750,846.

The development of broadcasting in other European countries still is comparatively backward, according to the union's figures. On January 31, the number of licenses was estimated at 430,000, Spain's 213,000 and Portugal's only 29,253. Belgium has 520,000, Switzerland 366,258 and Sweden 732,150.

Japan takes the lead in eastern countries with a total of 1,897,208 licenses issued.

## Noted Aviator Fined

**Investigating Crash Flies Army**

The Melbourne Times reports that Mrs. Amy Johnson Mollison, noted woman flyer, was fined 10 shillings (about \$2.40) in Brixington, England, for driving an automobile without a license.

A policeman who investigated an accident April 19 in which a motor-car was killed in a collision with Mrs. Mollison's car, said she had been unable to find her license and that when it was produced two weeks later it was found to be expired. Mrs. Mollison testified her secretary had neglected to renew it.

## Moved Court By Air

**Australian Judge Used 'Plane To Speed Up Justice**

Judge Wells of the Anzies Court at Port Darwin, Australia, recently used an airplane to speed up justice. Instead of summoning all concerned in a case to Port Darwin the judge moved his court by air to Alice Springs, 1,000 miles distant across barren country. With him he took the court clerk and the official of his court. By his actions Judge Wells saved the long trek to Port Darwin of a large number of witnesses, police officers and prisoners.

## Bees Wintered Well

Both in Canada and the United States bees have thrived through the winter in good condition, according to reports. Outdoor wintered bees were confined to their hives for three months though there were occasional times when the cluster could move onto fresh honey. It is long continued spells of zero and sub-zero weather that prove disastrous to bees.

The average citizen acquires 80 per cent of his education through the eyes, says the U.S. National Society for the Prevention of Blindness.

London received its first successful cargo of meat from Australia in 1880.

Shortland was invented in the days of the Romans.

## World's Largest Plane, Pride Of Soviet Russia, Collapses After Collision

Moscow.—The world's largest land plane, the Maxim Gorky, pride of Soviet Russia, crashed to earth Saturday after a collision with a small stunt plane, one of the 48 persons aboard the giant ship, along with Pilot Blagin of the other machine, were killed.

The disaster occurred over the village of Sool, Moscow suburb, at 12:45 p.m., but for 10 hours authorities clamped down a rigid control ship which delayed the tragic news. The council of people's commissars authorized Sunday's construction of three new planes of the same type as the Maxim Gorky.

Soviet authorities announced the new giant aircraft would be named Vladimir Lenin, Joseph Stalin and Maxim Gorky after three of the Soviet's greatest heroes.

The victims of the crash will be buried at the old Donoski monastery. The giant plane and the smaller one collided. The former broke in mid-air and crashed to the ground. It was the worst disaster with the largest death toll ever to befall a passenger plane.

Mikhail Koltsoff, head of the committee which sponsored the building of the original craft, telephoned the Communist party newspaper Pravda from Paris and said: "The Soviet Bolshevik never retreats."

He demanded that Soviet Russia build a "larger, more beautiful and more powerful" ship even than the old Gorky, to serve as a memorial to the victims of the disaster.

A motorist passing the village of

Sool when the accident occurred said Blagin's plane made two loops and was coming out of the second when it struck the wing of the Gorky near the point where it joined the fuselage.

"The Gorky trembled and lost altitude sharply," he said.

"The small plane stuck for a moment in the Gorky's wing and then fell away. The whole wing of the larger ship broke off. The Gorky slipped to the other side and then went into a nose dive."

Bodies of the 49 victims, many of which had been broken badly, were collected and held in a morgue for a state funeral. Eight of them were women and six, children.

The stunting of Pilot Blagin in the smaller plane, which was held responsible for the disaster, was an example of "a criminal lack of discipline" which the government and the Communist party are removing from the aircraft with hot iron, the newspaper Pravda, Communist party organ, said.

Orders had been issued never to stunt in the vicinity of the Moscow airport and Prava. It termed stunters "air hoodlums" and called for enforcement of orders against stunting.

An official explanation of the accident was the Gorky broke up because the small plane loosened a wing, throwing a sudden strain on all other parts when the huge craft went into a dive. The victims' families will be granted special pensions and a lump sum indemnity.

## Beatty Heads Scouts

C.P.R. President Re-Elected At Annual Meeting In Toronto

Toronto.—E. W. Beatty, K.C., president of the Canadian Pacific Railway, was re-elected president of the Canadian Boy Scouts' Association at the annual meeting here.

Other Dominion officers are: Chief executive commissioner, John A. Styles; honorary Dominion secretary, Gerald H. Brown; honorary counsel, Dr. Francis H. Gibbons.

The meeting heard a report that \$352,000 was subscribed to aid the growth of the Scout movement and it was predicted that the \$500,000 objective set by the governor-general, the Earl of Beaurbrough, would be reached before the end of the year. The total number of Scouts in Canada this year was 55,828, an increase of 1.62 per cent.

## Eulogizes Work Of Order

Sir Robert Borden Says Motto Of I.O.D.E. Is An Inspiration

Ottawa.—Highest eulogy of the endeavors of the Imperial Order Daughters of the Empire was given by Sir Robert Borden in a message read at the banquet by the municipal chapter of Ottawa to delegates attending the 35th annual meeting of the national chapter. The dinner was attended by 500 members and delegates.

Sir Robert, who was unable to be present, said "to those who believe, as I do, that the continued unity of the British Empire is an inspiration of the highest service not only to its component nations but to the world, the motto of the I.O.D.E. is in itself an inspiration."

## Farm Loan Board

Holds First Meeting Under Chairmanship Of John Barnett

Ottawa.—The newly organized Canadian farm loan board held its first meeting under the chairmanship of John A. Barnett, who succeeds Dr. J. D. Maclean in that position. Dr. Maclean remains a member of the board along with Charles Duquette, also a former member, and B. J. Roberts, controller of government guarantees, who represents the minister of finance.

Business was selection of provincial superintendents who will perform the functions formerly carried out by the provincial boards which were abolished when amendments to the act were adopted at the present session of parliament.

## Reduce Debts

Calgary.—In the first four months' operations of the farmers-creditors agreement act in the Calgary district farmers have had their debts reduced by about \$125,000. It was learned. The sum represents voluntary adjustments only and is not concerned with the act being made through the board of review.

## Open Second Court

Calgary.—Social credit-conscious foreigners seeking British naturalization have staged such a stampede on the Calgary court house that a second court to deal with applications has been opened. Many hundreds were on the waiting list.

## AT THE END OF THE LONG TRAIL

Miss Jean Batten, 25-year-old New Zealand airwoman, who has flown from Australia. Is shown waving to the cheering crowd on her arrival at Croydon Airport. She is the first woman to have flown to and from Australia.

## THWARTED PLOT

Tail, straight and white-haired, Nicholas Power of Halifax, N.S., former Chief of Police of the Nova Scotia capital, who has reached his 91st year, once played a thrilling part in the capture of the conspirators who planned to bring death to the present ruler of the British Empire, then a Prince, who was on the Halifax Naval Station in the post of Midshipman.

## Has Made Long Trip

Saskatchewan School Teacher Rides Bicycle To Prince Edward Island

Charlottetown.—Harold Petersen, 26-year-old Saskatchewan school teacher, pushed his bicycle over Prince Edward Island's red soil last July 14 and came to rest in Charlottetown after completing 10,500 miles of pedalling since he left, the little town of Assiniboia, last July 14.

His doctor told him he needed fresh air and exercise and by the time he arrives home next July he thinks he'll have given himself enough outdoor life to do him for many years to come.

The cyclist plans to take a trip eastward to Souris. Then he goes on to Cavendish, where he wants to see the scene of L. M. Montgomery's "Anne of Green Gables."

"There are a lot of good people in the world and a lot of bad ones but most of 'em are good," he mused as he reviewed his long trip, which took him into nearly every province in Canada, the southern States, Mexico, and into the Maritime provinces.

## Famous Diamond

World's Largest Uncut Stone Goes To United States

London.—The famous Jonker diamond, world's largest uncut stone, will go to the United States. Its sale to Harry Winston, New York merchant, was announced by Ernest Oppenheimer, its former owner, profited \$435,000 on the transaction.

Oppenheimer bought the stone from Jacobus Jonker, South African prospector who found it, for \$350,000 in January of last year.

## Conference Of Coal Dealers

Winnipeg.—A Recommendation A conference of coal dealers he called to consider means of saving and increasing the Canadian coal market was approved at the annual convention here of the Western Canada Fuel Association.

## Unethical Practices In Business Scored By Hon. H. H. Stevens

### Radio To Be Discussed

Minister Of Marine Said To Be Dissatisfied With Present Act

Ottawa.—Radio will be one of the first subjects discussed with Premier R. B. Bennett by his colleagues on his return to Ottawa it was learned. Life of the bill under which the Canadian Radio Commission functions was extended before adjournment until June 1.

It is known Hon. Alfred Durand, minister of marine, whose department has general supervision over radio, is dissatisfied with the present act. The commission has at its disposal about \$1,500,000 a year, derived out of receiving licenses. From this it must pay costs of administration, of programs and of leased wires, and has not enough left to provide high-powered stations on a scale comparable with the developments in the United States.

Proximity of the Dominion elections, however, may result in continuing the present act for the remainder of the year.

### British Election Sighted

Rumor That Stanley Baldwin May Take Over Premiership

London.—Political quakers speculated on the possibility of a resignation of the cabinet. Prospects also were believed to indicate there might be a general election in the autumn. The likeliest story circulating in the lobby was that Prime Minister Ramsay MacDonald and Stanley Baldwin, Conservative leader and lord president of the council, would change places.

Many government supporters believe an election in October would be more favorable to the government than one next spring or later in 1936. The recent government victory in the West Edinburgh by-election was considered evidence that the government's stock at present was high.

### Currency Stabilization

Should Take Dollar Out Of Politics, Says Sir Josiah Stamp

Stanford University, Calif.—Great Britain will consider what stabilization of currency when it is definitely understood "the dollar is out of politics," Sir Josiah Stamp, director of the Bank of England, said in an address here.

"Great Britain is eager and willing to stabilize its currency," Sir Josiah said.

"Revel of foreign trade and currency of all countries depend upon an international agreement on stabilization. Great Britain is afraid to lead the way until it finds out the policy of the United States."

"We do not know how much political pressure will be brought on President Roosevelt and what effect it will have on the administration's monetary policy."

Ottawa.—Every conceivable device is being brought into play by some of those who control "big business" to prevent every "bab and blow" of business from running smoothly."

Hon. H. H. Stevens, former minister of trade and commerce, said in an address here. The culprits were actuated only by motives of greed, in order solely to secure selfish advantages over competitors. The conflict today in the business world was one of "organized selfishness against disunited virtue."

An "eminent authority" had said the other day that 90 per cent of the people were honest, said Mr. Stevens. He himself would not place the percentage as low. The point, however, was that while the great body of business men were conducting their affairs in an honorable way, yet in every business there were individuals, moved only by predatory instincts, who operated with a selfish disregard for all ethics. And, he added, it is to be remembered that small percentage often comprised those who occupied a dominating position in various branches of industry.

Progress, he asserted, compelled constant revision of standards; and the possession of ethical standards of no value unless they were professed those ethics had the will to practice and enforce them. All things changed. "The text-books of sociology and economics which served a generation ago were now out of date. So also were the industrial methods of a few years ago. Customs of honesty were themselves subject to change."

Mr. Stevens was severely critical of the present state of stock market operations as a barometer of business. Newspapers had headlined the activity of the New York exchange, yet the rise in price of men ventured to say these had been deliberately manipulated by gamblers, and when the "lambs" were encouraged to enter the speculation, they would find themselves duly fleeced.

### Gift To Canada House

Portrait Of King Unveiled By Duke Of Kent

London.—In the presence of a large gathering of prominent persons the Duke of Kent unveiled a portrait of His Majesty presented to Canada House. The painting is a replica of the portrait presented by T. B. F. Davis of Jersey and Durham, South Africa, to the Victoria College, Jersey, in memory of his son killed in the war. Similar replicas are being presented to the University of Australia, Australia and New Zealand and Durham University.

### Snow Gormination

Saskatoon.—What, under normal conditions usually shows above the ground in from 10 to 14 days, the snow on the plots of the University of Saskatchewan, owing to continued cool weather, clouded skies and cool temperatures have prevailed since the snow appeared.

## Blind Astronomer Dead

Dr. Frost Continued Work After Losing His Sight

Chicago.—Dr. Edwin Brant Frost, 65, the astronomer whose slightest eyes enabled the world to see the universe more clearly, died in hospital here from peritonitis.

Director emeritus of the University of Chicago's Yerkes observatory at Williams Bay, Wis., he was famous for his knowledge of astrophysics.

He retired in 1931 but continued active in work at the observatory until overtaken by illness four years ago.

Primarily, Dr. Frost was a teacher and the blindness which afflicted him 15 years ago he surmounted to continue his work.

Seeking the secrets of the stars through eyes of assistants, after his retirement Dr. Frost evolved the hypothesis that the solar system was created by exploding stars.

Want To Reach Agreement

Tokyo, Japan.—The council of the Japan-Canada Society, which includes many influential business men, has passed a resolution urging that the government make another attempt to reach an agreement with Canada for the lifting of restrictions against Japanese goods. The society is not successful, to apply Japanese trade protection law against Canadian imports.

## Ceremony Re-Enacted

Celebrate Anniversary Of Driving The Last Spike Ont East-West

Jackfish, Ont.—Near this tiny railway and fishing hamlet on the north shore of Lake Superior, Canadian history was re-enacted when the 50th anniversary of the driving of the last spike in the east-west portion of the Canadian Pacific Railway was observed.

In the presence of a large party of railway officials and pioneer workers of the line, Alex Anderson, M.P. Port Arthur, who assisted at the informal ceremony on May 16, 1885, with a few vigorous blows drove home a spike in the place of its historic predecessor.

## Railway Job Sharing Plan

Toronto.—A plan for "job-sharing" on Canadian railways which, it is claimed, would put 25,000 men back at work at once and would save Canada \$100,000 a year, is advanced in a letter being sent to all senators and members of the House of Commons by a committee of railwaymen.

## Many Prospective Tourists

Ottawa.—The tourist bureau which is under Hon. R. J. Munton, minister of agriculture, says he has more than 14,000 inquiries from people in the United States during the past six weeks.

## Prospects Are Good For Crops In The Western Drouth Areas

Winnipeg.—The cycle of "dry" years, which brought recurring droughts of almost unprecedented intensity to a huge area of the prairie provinces, apparently is ended. Official figures show precipitation is normal in the west.

Prospects for good crops in the "drouth area" of Manitoba, Saskatchewan and Alberta this year appear the best since 1928. "Practically all the dry areas have received excellent precipitation since April 1," reports A. H. McCauley, head of the Dominion meteorological bureau here.

"All districts of the prairies," the weather man went on, "have received at least two or three times as much rain since April 1 as in the same period last year. The only exception is northern Manitoba."

Most striking increase in Saskatchewan is at Moose Jaw, where 4.30 inches of rain have fallen this season and 32 in the April-May period in 1934. That northern Saskatchewan city already has received 1.7

inches of rain more than the normal for the two-month period.

In Alberta, the average fall has been 2.38 compared with the average in the same period of 1934 of 0.28. The greatest gains have been recorded in "dry" areas.

Ottawa.—The government's program for rehabilitation of drouth areas in western Canada will be carried on notwithstanding improved conditions, it was stated here.

Reports from the prairie provinces of greatly increased rainfall, giving rise to the view that the cycle of dry years is ended, will not interfere with steps already under way to guard against repetition of the drouth conditions, if that can be done.

Dr. G. H. S. Barton, deputy minister of agriculture, who has just returned from the west, said that more than rain was required in the drouth areas. The program for rehabilitation involves the prevention of soil drifting, revamping of agricultural practice in some areas, conservation of water, and other things.

# Recent Tests Under Practical Conditions Show That Television Is Now Beyond Inventive Stage

For years we have been told that television was "just around the corner." When, therefore, David Saroff assured the stockholders of the Radio Corporation of America that the fruits of research were about to be exhibited to a chosen few—and this means next year—he must have been aware of the skepticism with which his predictions would be received by the thousands who have been waiting to push a button and twist a dial to behold the President as he addressed them or watch the winner of the Derby leading the field.

The fact that Mr. Saroff commits his company to tests under practical conditions is in itself evidence that television has been carried beyond the early inventive stage. He pins his faith on the iconoscope of Dr. Vladimir K. Zworykin—an apparatus which sprays electrons like paint to form an image on a highly exhausted tube, and which there is every reason to believe, deserves the praise that has been lavished upon it. If that device comes so long in coming, it is partly because the entire new science of electron optics had to be developed. Now that the foundations have been laid, the engineer can design television which may be entrusted to a few score critics who will report how they like what they see, and which they want. The sum of \$100,000, which Mr. Saroff allows even for this present grouping of tests, is small. In the end much more will be spent before next year which will outstand the efforts of dial-voicers to wreck them. Edison developed elaborate machines to kick, bounce and otherwise abuse his storage battery, knowing, as he once said, that "it will be put out of business in ten minutes by any truck driver." Years passed before he discovered how the ingenuity of ignorance could be thwarted.

There never was a technical problem so difficult as that presented by television. In the light of present knowledge the country must be wired with high transmitting stations if there is to be national broadcasting, and this for the reason that the image-carrying waves are so feeble, they are easily blocked by tall buildings and mountains. Thirty miles is the range of a transmitter. Hundreds of millions must therefore be invested in a myriad stations. And there still remains the task of providing a public that flicks over a knob to the motion-picture theatre with a new play every night. It is easy to understand why only a million should be contentedly set aside to take the first step.

What is especially encouraging in Mr. Saroff's announcement is the implication that he has been at work in these last years. The timidity of capitalists is proverbial. Yet here we have an example of their rationality, courage, their readiness to create a new art and a new industry, and to realize a romantic ideal. Television is not likely to extend its arms from the financial mire. Yet it may well reveal its strongest impetus in the darkest of economic times, for because there is an unquenchable faith in the part that the scientist and the inventor can play in the onward creep of society—New York Times.

## Armored Cars

**Ministry Of National Defence Experimenting With New Type**  
The ministry of national defence is having experiments made by Canadian motor munitions units with the armored cars—ordinary, four-wheeled automobiles with special plating, it is stated. The experiments are in the initial stage and are speedily progressing. Reports that tanks were being made was strongly denied.

"Canada hasn't got the technology," a senior defence official stated, "nor has she the slightest intention of starting on tanks. These cars can be so stretched of imagination as to make tanks. We are just trying out a few experiments with ordinary cars, for troops."

**Canadian Physical Association**  
Dr. A. S. Lamb, director of physical education at McGill University, was re-elected president of the Canadian Physical Association at the concluding session of the association's annual meeting in Montreal. The presidents elected for the coming year included W. G. Brandeish, Vancouver; Miss K. M. Cartwright, Saskatoon; Sask., Robert Jarman, Winnipeg.

## Few Aircraft Accidents

**Figures Indicate That Aviation In Canada Offers Comparative Safety**

Evidence that aviation in Canada is becoming increasingly safe was shown in figures compiled by the civil aviation branch of the department of national defence. In 1933, the accident during the last three years, 12 persons were killed and nine injured. Among the dead were three passengers, four pilots, three other crew members and two bystanders. Seven pilots and two passengers were hurt. In 1932 the total number of deaths was 25, including 12 passengers and eight pilots. Thirteen persons were hurt, including five passengers. The aircraft miles flown were 4,538,315 in 1932, a record of 12 persons were killed and 13 injured, while the mileage flown was 4,538,315 in 1932 and 1,523,014 miles the year before.

The 1934 record of fatalities showed one person killed per 928,234 miles flown, compared with one in 328,821 miles in 1933 and one in 571,141 in 1932. One passenger was killed per 2,165,879 miles flown last year, in 33,193 miles in 1933 and one in 1,523,014 miles the year before.

## Safety On The Highways

**Motorists Who Decide To Be Careful Will Help Greatly**

After all is said and done the matter of safety on the highways is up to the motorists. They can decide for themselves whether this summer is to be a time of happiness or pleasure on the road, or a season of frightening terror, accident or death. If all intelligent, responsible motorists decide to be careful, to drive carefully and responsibly, to observe the courtesies of the road; if they will be patient and obey scrupulously all laws and regulations, reasonable or unreasonable, because they are laws, not because of fear of penalties, the problem of safety will be solved. Reckless, careless, indifferent and incapable driving causes most casualties. The trouble is not with the cars, they will stand up under what is demanded of them. The trouble is with the human equation which can be taxed only so far. Speed will have to be kept more within reason and human capacity if deadly accidents, and in particular crashes between car and car and tragic roadside pile-ups are to be reduced. The speed problem may never really be solved until where except as result of the working of an aggressive, militant public sentiment. But safety is up to the driver. Catharine Standard.

## Claim Magical Powers

**Tibetans Assert They Can Create Heat By Suggestion**

The mysterious powers of the Tibetans were described at Berlin, Germany, by Dr. Eysenhardt, leader of an expedition which has just returned from the Himalayas.

Telepathy, he said, employed in Tibet just like the telephone in Europe. A messenger was sent on a 12-day journey to the headquarters at Darjeeling to report the death of a bearer. When he arrived he found that the local natives had already informed the officials of the death on the same evening of which it occurred.

He told how the Tibetans are able to create warmth through the power of suggestion. They cannot only spend the night in the snow, clad only in a shirt, but by the heat given out by their suggestion they can dry wet clothes placed on them.

One who can dry six wet cloths is a "pupil"; he becomes a "master" when he can dry 30.

## Becoming More Modern

Medicine, nursing, dentistry, pharmacy are the principal sciences which are attracting Japanese women. Leading women in Tokyo have a society to study the municipal administration and general city affairs, and women are taking their place in the modern life of the nation as a whole.

They are becoming more economically, socially and personally.

Socialist: "After all, what is the difference between the rich man and the poor man?"

Bystander: "The rich man has a cold, the poor man has a cold."

## PRINCE OF WALES PRESENTS SOCCER CUP

Here we see the Prince of Wales presenting the coveted Association Football cup to the captain of Sheffield Wednesday after the soccer final between the Wednesday and West Bromwich Albion. 93,000 people saw the game in the Empire Stadium at Wembley.

## Survey Tells The Tale

**Shows Western Ontario Has More Horses Than Cars**

"Now that the automobile has taken the place of the horse," famous words of an after-dinner speaker.

But look at this excerpt from one of the surveys recently made by W. H. Wood, manager of the London (Ont.) Chamber of Commerce.

"The pasting of the stage coach and the coming of the automotive vehicle has not by any means meant the passing out of the horse, for there are to-day in Western Ontario over 82,500 more horses than automotive vehicles."

There are 343,000 horses valued at more than \$21,478,000.

There are 106,450 automotive vehicles which averaged at a value of \$1,000 each represent \$106,450,000.

"The value of the automotive vehicles over the horses is in favor of the first, mentioned by no more than \$13,970,000."

## India Saves Millions

**Machine Has Been Invented To Kill Off Insects**

A machine designed to rid India of its traditional pestilence of mosquitoes and other insects around widespread comment at Hyderabad, India, following a successful demonstration by its inventors, the French engineers Menasse and Demoultier.

Experts witnessing the demonstration declared the machine, which consists of an ultra-ray burner and a suction fan, is probably the best means of destroying insects that have ever been demonstrated.

The machine is said to be particularly effective against agricultural insects, which do millions of dollars' worth of damage to crops in India every year.

Your breakfast coffee may soon be brought to the table in the form of chips about six-thousandths of an inch long and only three-thousandths of an inch thick.

## The SNAPSHOT GUILD

Get In the Picture Yourself

You too can get in the picture if you use the self timer.

"I enjoyed the Snapshot Guild very much," wrote a letter from a lady who had just taken snapshots of my children in almost a hobby with me," wrote a reader. "I was hoping, however, that you would tell mothers how to include themselves in the picture with their children," she continued.

Perhaps others are interested in this subject. The self timer is a most fascinating little gadget and almost human in its operation. It is an inexpensive accessory that fits over the metal button or plunger, at the end of the cable release, which you press to take a snapshot with a folding camera. It cannot, however, be used unless the camera is fitted with a cable release.

Here is how it works. First you locate your subject in the finder and at the same time plan the space you will occupy when you step into the picture. Suppose you want to take a picture of Jane sitting in your lap as you read to her. You will have to have the camera on a tripod (table or something solid). Locate the chair in the finder and be sure you can see all of the chair, especially the upper part of the back where your hand will appear—for if you are not careful you will find that the camera has cut off the head when the finished prints are returned.

If the picture is to be taken in hours you will have to apply all the rules of indoor snapshotting. The diaphragm should be set at f5.5, the

shutter speed at either 1/10 or 1/25 of a second and you will need one or two photoflood lamps placed in an ordinary floor lamp (with the shade well removed) to give more illumination to the side away from the outside light.

When the diaphragm is set at the proper opening with the correct shutter speed, the same as if you were going to snap the picture yourself, set the self timer for ten seconds or a minute, depending on how long it will take you to get into the chair with Jane comfortably seated in your lap, ready to listen to your story on a million dollar smile—and slip the timer over the button at the end of the cable release, press the little release lever on the self timer and it starts buzzing away, and then click—it has taken your picture.

In spite of the simplicity of the procedure, it is going to get the thrill out of it and when the picture is snapped she'll probably be pouring a million dollar smile—and this will add much to the value of the picture.

You can purchase the self timer attachment from almost any store that sells cameras. They are not expensive and last a lifetime.

Some cameras have self-timers incorporated in the shutter so if you have this type of camera or have never used the self-timer you will miss a lot of fun and picture possibilities.

# Saskatchewan Mine Is Worked Under Direction of First Woman Coal Mine Operator In Canada

## Skill Is Required

**Managing A Parachute Not As Simple As It Looks**

Pilots and officials of airlines in New York explained why passenger airplanes do not require parachutes for passengers, while many persons thought, after news of a recent crash in Missouri, might have incurred safety for the victims.

No passenger airline in the world they said, requires parachutes on a plane, because they believe that parachutes would cost more lives than they would save. To open a parachute is a knack and requires a certain familiarity with their mechanism. To pull a parachute is not as easy as a life preserver on a ship, and passengers are untrained in this technique.

Furthermore, it was said, dropping in a parachute and landing safely is not easy. One must count five seconds before pulling the ring which releases the parachute folds. If one pulls the ring too soon, the chute folds in the tail of the collapsing ship and the pilot falls.

It takes considerable reputation and much practice when one is falling rather than waiting to wait until the proper second to pull the ring.

The parachute jumper must steer his parachute to clear obstacles below. If he lands in a tree or hits a house, it is almost certain to be a strong wind, which frequently causes airplane crashes, will drag the parachute along the ground and only skill in landing will avoid this mishap. In crashes of passenger planes, the consensus was, passengers are safer inside the plane.

Most accidents occur on the take-off at a low altitude and altitude is necessary to manipulate a parachute.

## Protect Civil Population

**Compulsory Air Raid Drill May Be Instituted In Britain**

Drafting plans which may call for doubling the home strength of the British Royal Air Force at a cost of £100 million over the next three years, the air ministry advised British aircraft manufacturers not to expect foreign orders without consulting the ministry.

While the ministry was warning manufacturers of the likelihood of a considerable demand on their facilities by the government it was forecast that compulsory air raid drill may soon be a feature of the life of the country. It is understood a country-wide scheme is in preparation for making the population of the United Kingdom "air-raid-minded" as part of the comprehensive plan for protection of the civil population.

## Prefers His Records

**French Meteorologist Has Own Idea About Forecasting Weather**

"Weather forecasting is easy, if it were," said Olympe Mouton, meteorologist for the French government near Cannes who has been visiting in Montreal. "The necessary 'art' consists of a weather record for at least a century applicable to the district for which the forecasting is to be done."

It believe in the record of past weather," said Mr. Mouton. "I would not cast discredit upon the scientific knowledge of groundswatchers; nor would I say it is incorrect to count the nuts stored by the squirrel. I have an opinion. But I do prefer my records."

## Prairie Tree Planting

Several of the provinces of the Dominion have made provision for distribution to farmers of young trees for planting, at little or no cost to the recipient. The eldest established scheme of this nature is that originally established by the Forest Service, Department of the Interior, in the Prairie Provinces, and now operated by the Federal Department of Agriculture. This has its headquarters at Indian Head, Saskatchewan.

Similar schemes are being carried out in the provinces of Ontario and Quebec have similar schemes.

## Connaught Cup Winner

Michael MacBrien, son of Major General J. H. MacBrien, commander of the Royal Canadian Mounted Police, was awarded for the second time the Connaught Cup donated by the Duke of Connaught, former governor-general of Canada, for physical training at the annual Ashbury College gymnastic exhibition at Ottawa.

In the national aristocracy of business, Miss Jessie Hamilton, demure student of mining details, occupies a niche among the first flight. To prove woman's claim to a choice of professions, she stepped from a Manitoba country school into the heart of Saskatchewan's coal fields and emerged Canada's first woman coal mine operator.

The hum of hoist engines, each capable of lifting 500 tons of coal each day, penetrates the trim office she occupies on her vast holdings, a few miles west of Blanford. But Miss Hamilton, who slipped into the breach to carry on the work and plans laid by her father, explains it was all a matter of necessity.

The training she received before the death of her father, R. L. Hamilton, one of the early pioneers in this coal mining district, stood her in good stead for the career she was to adopt. She is a graduate in arts of the University of Manitoba. For a time she taught school at Mile 214, south of Churchill in northern Manitoba.

Recently employed, Miss Hamilton came to her rank as mining manager not alone by right of heredity but by a succession of achievements that rank her as a leader in a man's vocation. Since the opening of the mine site, in 1926, there has been a continuous record of such achievements in which the new owner has played no small part.

Shortly after opening the new mine, the scale of palaces of water poured in on miners in the workings. Electric pumps were installed capable of pumping out 17,000 gallons of water each hour. Such achievements were employed and other improvements carried out to make the mine one of the leading operations in the coal field.

Miss Hamilton is modest about it all. She does not like the suggestion that she is the first woman manager of a coal mine. She has sufficient confidence in the men working for her to accept the responsibility and undertake to master detail associated with a sizeable mine.

## Always Plenty To Do

**Woman Guide-Lecturer In British Museum Likes Her Work**

Miss Marion Thring who, in competition with more than 200 men, was the first person appointed to the Victoria and Albert Museum in London as full-time guide-lecturer, has finished her third month of work.

She has covered nearly 1,000 miles of the museum galleries, and learned all the high spots and more of the museum's treasures.

But she must walk another 1,000 miles and study another 10,000 objects of art and sculpture before she is equipped for her job. The first of her regular schedule of lectures will not take place until early in July. "I come twice a week for a paid roller skates," she said in an interview. "There are several lifetimes of work here. At first I was crushed by it all. But now I rejoice because I can never come to the end of it and there will always be something fresh and new."

The only disadvantage of being a woman in her present job, she finds, is that she has no pockets. She carries the two huge master keys of the museum, which she is supposed never to put down, on a long cord about her neck.

## Arduous Journey

**Returns After Jaunt Of 400 Miles Across Northern Canada**

Seven weeks of the most arduous trekking at an end, David Irwin, of Grand Rapids, Mich., was back in civilization, recuperating from the rigors of his jaunt across northern Canada from Baker Lake, Northwest Territories, to Churchill, Manitoba, but three days to draw his last after a journey of more than 400 miles. Irwin was associated with Andrew Hall in the expedition, but left from Alaska, but left the expedition two years ago.

## Need More Planes

Liberals are with the government in its demands for more fighting planes for Great Britain. Sir Herbert Samuel, Liberal opposition leader in the House of Commons, said in a speech recently in Lancashire. "The country cannot take the responsibility," he said, "of leaving the country inadequately defended against risks which are possible and may become realities."

## TO BE SURE YOU GET Fast Relief

DOES NOT HARM THE HEART

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" — eases even a bad headache, neuralgia or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all drugs.

**Demand and Get**

**MISS ALADDIN**  
—By—  
Christine Whiting Parmenter

Author of  
"One Wide River To Cross"  
"The Unknown Port," Etc.

CHAPTER I.—Continued

Darkness descended on the house- hold early that night, but not rest. Plans and more plans whirled through James Nelson's tired head. Margaret, his wife, sat up in bed, pale as a sheet, her eyes wide open, her hands clasped in prayer. She was thinking about the girl, Louise, who had said she would come to the party, and perhaps they had; but she was their only daughter. No knowing what life would bring her later on, and they'd so wanted her to have a happy youth—a carefree youth. Parties. Gayety. Good times. And Nancy was pretty—astonishingly pretty. Somehow she seemed made for just that life. Already a year of new and lovely gowns hung in her closet awaiting the thrilling day ahead. Moving cautiously, the girl's mother wiped away a tear.

In the room above Louise Nelson was staying at a patch of brightness on the ceiling, drifting in from a street light below. She, too, was thinking about Nancy. "If only they taught her to be something besides a butterfly," she told herself, "this would become so hard. Not that the child hasn't got courage, though. It showed tonight when she kept a stiff upper lip while her house of cards tumbled to pieces before her eyes. That was a fine spirit my father used to talk about, showing up in a softer generation. I dare say. But she can't do a thing to help. Not a thing. No training whatever. Not that she'd have had much time for training at her age; but I doubt if the girl has ever made a move."

Across the hall Aunt Judy was fighting home-sickness. She adored her family. It was hard for her to leave them even for a week-end; and here she was destined to spend six months in Europe with those "cranky" Spear girls. It was all settled, in her relief at the suggestion Mrs. Spear had almost cheered over the telephone.

"If suppose," Aunt Judy scolded herself, "that any one would say I was in luck. A trip abroad and a good salary just when it's so good for me. The truth is, I'd rather be at Edgemoor cooking for the family! I do thank they all wonderful. Margaret's a trump. She's so ambitious. Nancy, yet she never whimpered. And Jack! He didn't consider anything except helping his father. Oh, to give up Mary Ann, and her. Why, the boy worships that car!"

**HEALTH MEANS CHARM AND HAPPINESS**

Sparkling eyes and smiling lips are signs of health and vitality. Clear skin attracts the healthy attraction. It is both happy and healthy. Perhaps you are really ill yet when the day's work is done you are too tired to enter into the good times that other women enjoy. For extra energy, use Lydia E. Pinkham's Vegetable Compound. It tones up your general health. Give your system more pep and charm.

Remember that 98 out of 100 women report benefit. Let it help you too.

And Nancy? (Aunt Judy winked back the tears.) "I wanted to cry for her, poor darling! She's been so thrilled and excited over this debut. . . ."

As for the girl herself, she lay on her beautiful four-poster trying to assemble her shattered world. It seemed incredible that such a thing could happen—to her. It just couldn't. "Why, Edgemoor?" she mused, "it is the jumping-off place. One might as well be buried alive. I don't see how even Mother can endure it, especially with no Aunt Judy to help out. Come to think of it, there's only one bathroom for the entire family!" She threw a glance toward the door that led to her own whitened bath; and as if she could see into the closet that lay beyond, a vision of the new gowns hanging there, waiting her entrance into what Jack called "the social whirl," rose before her, and the girl's eyes misted.

"I'll never wear them now," she pondered unhappily. "And my white fur evening wrap! I wish I hadn't saved it for the great event. Maybe she should take it back, though. I'll never use it in—Edgemoor. . . . I wish I could get a job like Jack; but what good am I? Aunt Louise was right. . . . I can't earn my salt, not to mention my silk stockings. . . . What'll the girls say, and the boys when they hear the news? Not that I mutters. I'd like to help him, but—but I'm just useless. . . . Can't even pay my board. . . . No one would pay me. . . ."

Nancy turned her head. The door was opening cautiously, and as she switched on a bedside light the girl saw a brother, clad in pajamas and a bathrobe.

"What, on earth do you want this time of night?" she questioned. "Is the ship about?"

Without answering, Jack closed the two windows noiselessly and sat down on the foot of Nancy's bed, drawing his knees up under his chin.

"Sit," he began in a mysterious whisper. "I've got a perfectly corking scheme. I want you to forget Cousin Columbine's proposition."

CHAPTER II.

Cousin Columbine's proposition! Nancy had not given it a thought since the week before when Jack, home from school for an unexpected holiday, had met the postman at the door and brought a letter into the dining room where the family was at table.

"It looks like a long-winded scrawl from Dad's venerable relative in Colorado," the boy observed. "You read it about Aunt Len."

He tossed the missive deftly across the table where it landed within an inch of his sister's hand. "That's all regarding the business," he said, "but it's a fine letter."

Dad smiled. "You're dear. It can't be very private. The old lady hasn't written for a long time. What can she want?"

He turned to his remaining days on his, perhaps, "opened Jack fearfully as he sat down and his aunt drew some finely written pages from the pocket of her dress. "What's she say, Aunt Lou?"

"Give me time to find out, please," she returned with a blush at her ears. "I am so fond of them that I can't read them. 'Dear Cousin James: It is my far-distant relative has reached me; and now I am writing to ask what I trust will not be regarded as a favor.'"

"What I say?" Jack spoke in Jack's tone. "She wants to live with us! I felt something—something ominous creep down my spine when the postman handed me that letter. Go on, Quick."

Louise Nelson, always impatient at interruptions, paused for an aggravating moment before continuing. "It's a favor. I suspect I am getting old."

"Old is right!" burst impressively from the soldier. "Why, she's a pioneer, isn't she? One of those cast-away people who—"

## THE CHORE GIRL

All Copper Pot Cleaner  
Safe, efficient, will not rust nor injure. Removes all dirt, grease, and scale. Cleans all copper, brass, and tin. Cleans all metal. Cleans all metal. Cleans all metal.

Hamilton, Ontario

This was Jack once more, but no one thought to reproach him for the interruption. Even his Aunt Louise appeared unconscious of it. Dad sat suddenly erect. Mother's mouth opened, and stayed that way a mile. Aunt Judy writhed: "What's the woman thinking of?"—while Nancy herself was staring at him all in blank amazement.

"Me?" she gasped, after a speechless moment.

"For Pete's sake, read on, dear," commanded Jack; and as they all leaned forward in sudden interest Louise Nelson said:

"Let's see, where was I? Oh, here's the place. . . . as soon as possible. . . . I know you are well liked financially, my dear cousin. I shall insist on paying the girl's travel expenses. I shall agree to give her twenty-five dollars every month, and her duties will not be arduous."

"That's a better lot, by far, than I like to expect to get 'em done by," Nancy observed Jack dryly; and his aunt continued:

"As I have had mentioned in previous communications, my good neighbor, Aurora Tubbs, does my cooking and housework. . . . I have my own not infrequently lack. I should expect your daughter to dust the morning glories every morning, do her own washing—"

At this point, unable to restrain himself a moment longer, Jack gave vent to a sort of war whoop; and his aunt declared in exasperation: "Really, Jack, if you can't keep still until I finish, some one else may have the pleasure of reading this ridiculous proposal."

"Oh, go on, Louise," pleaded Dad. "I don't want to interrupt you. . . ."

"You are to expect her to be in not later than nine-thirty, my bed time; and though I prefer that she should entertain no young men callers, if she does, it occurs to me that she must leave at the same hour."

Aunt Louise paused, amused eyes meeting those of her husband. "No boy friend for our Nancy? That settles the matter, Dad. Just wire your antiquated cousin that your charming daughter doesn't qualify for the position."

"Keep still," begged Nancy. "I never heard anything so—so wild in my whole life!"

Louise Nelson was smiling now. "You are to read the daily paper to Cousin Columbine," she said. "And listen to that! If Nancy will her need I should want the girl to be a bit of dreammaking now and then. She would get supper of Thursdays (Aurora's evening off) and in case of illness on my part it might be necessary for her to wait upon me. That is all, I think. And it's enough," declared Aunt Louise, interrupting herself this time. "If judge they haven't met the servant problem at Pine Ridge, Colorado."

"What she wants is a slave," asserted Jack. "I can't quite see my delectable niece being made up to make and cook for a prehistoric old lady one hundred-and-fifty years old. Can you, Dad?"

(To Be Continued)

France originated the idea of honoring the unknown soldier. . . . But all those who lost their lives in defence of their country.

## LAME BACK

GIN Pills give prompt relief from backache, sciatica, rheumatism, kidney troubles. They soothe and heal irritated tissues and assist the kidneys in their function of eliminating useless waste matter from the system.

FOR THE KIDNEY

## Find Mysterious Garden

A mysterious flower garden, 15 acres in extent, and full of delicately perfumed plants in bloom, has been found in the wilderness surrounding Adam's Peak, the sacred mountain, of Ceylon.

Nowhere in this garden was there even a square foot of waste land, and there was any plant more than three feet high; yet there was not a living soul to be found for miles around in the wild wilderness.

The discovery was made by a band of youths who set out from Colombo to search for the Holy Cave of Ceylon, believed to be in the neighborhood of Adam's Peak.

The cave, known as Deva Gubava, is one of the 16 places of special sanctity mentioned in the Pali Stanza, one of the Buddhist Scriptures.

All the other 15 are known, but no one has ever come back to tell of the finding of the Deva Gubava.

Chinese monks who dwell near the Peak 40 years ago split near the monks of St. Bernard. . . . are believed to have known where it was, but they are all dead.

Many have tried to find the Holy Cave, but none has ever returned. . . . Once a priest, confident in his sacred character, ascended so far that he might be killed at night was observed beneath the overhanging summit of the haunted mountain.

Next day he returned, a maniac, unable to give any account of what he saw.

In 1857 a band of Buddhist monks made up the story. . . . They seized some of them when they reached the base, and they turned back. The more stout-hearted carried on, but before they reached the summit they all fainted.

One of the monks, when he recovered his consciousness, declared that he had seen a magnificent temple reared to him, adorned throughout with gold and precious gems, and in the interior, resplendent beyond all else a sacred foot-print.

## THE RHYMING OPTIMIST

—By Aline Michaelis

YOU  
How many people have you been  
What years went out with new  
How many years have you been  
How many have you can truly say  
I had seen a magnificent temple  
You have been wicked and you have  
Caught in strange circles, misadventure  
You have lived and toiler both  
Proud of your industry, shamed by  
Widely experience you have been  
Simple as Adam was in Paradise.  
Once a sophisticated, worldly and  
Suddenly childlike, untutored and  
How many people wander now  
Back of your smooth, untrodden  
How?

Would Make It Compulsory

National Research Council Committee Wants All Milk Pasteurized

Compulsory pasteurization of milk offered for sale in Canadian towns and cities was advocated by the National Research Council's Associate Committee on Tubercular Research in a resolution adopted at Ottawa.

The committee declared that it had "been amply demonstrated in the work carried on under the auspices of the National Research Council as well as in other institutions, that the pasteurization of milk will destroy all bacteria harmful to man."

The committee affirmed also that milk and cream, by conveying the organisms of tubercular septic sore throat, undulant fever and typhoid fever.

The committee affirmed also that many of the cases of tubercular arising in children are of bovine origin.

## Europe's Tallest King

King Haakon VII. of Norway is the tallest king in Europe—six feet four inches tall. He is not a Norwegian, but a Dane, and his real name is not Haakon, but Carl. He was chosen to rule Norway when that country broke away from Sweden.

He was then the second son of the King of Denmark. One reason for being chosen was that he had always been an outstanding athlete, a true test of popularity with Norwegians.

Customer—"You're a young man to be left in charge of a chemist's shop. Have you a diploma?"

Assistant—"No, mum; but we have a preparation of our own that's just as good." 2009

## Show No Change

Scientists Say Jellyfish Same As 250,000,000 Years Ago

Jellyfish which turned into stone have been found by Cornell University scientists near Cortland, N.Y.

This discovery, which has been announced, appears effectively to wipe out the basis of the evolutionary jibes that man may have descended from an ancient jellyfish. For the Cornell discovery shows jellyfish have not changed appreciably in 250,000,000 years.

Horses took only 40,000,000 years to evolve from little, five-toed creatures, and in a period of much less than 1,000,000 years prehistoric man or creature closely resembling modern humans, rose rapidly up the scale of development.

The fossil jellyfish are about the size of saucers. The concentric rings of stone which came from mineralization of their bodies indicate how little they differ from the jellyfish which float ashore in all the oceans to-day.

They apparently had even then the stinging, net-like tentacles which pain swimmers to-day.

## Receives Medal From Prince

Lieutenant Rescues Man During Storm At Great Peril To Himself

Award for the bravest deed of the year, the Stanhope Gold Medal of the Royal Humane Society was presented at York House by the Prince of Wales to Lieut. Hugh Richardson of the H.M.S. Wolfhound.

Richardson saved the life of a sailor who had fallen overboard during a gale in the North Sea, off the coast of the H.M.S. Wolfhound.

The rescue was carried out in pitch darkness in the early hours of a stormy winter morning.

Edmund Archer, aged 19, was crossing the deck when a huge wave broke over the destroyer and swept him over the side.

Lieutenant Richardson heard the cry "Man overboard," and placed a luminous lifebelt over his head, diving to the bridge into the sea.

He put the lifebuoy round a mile, but was himself swept half a mile to sea and it was some time before a boat found him.

## Civilians Being Trained

Germany Not Taking Any Chances On Air Raids

Germany is busily preparing itself against air raids, according to well-informed British observer who recently stopped in Brussels, Belgium, on his way from Berlin.

The whole civil population, he declared, are being trained in what to do in "air war" starts. Berlin is now well on the way towards "air imprudence," with an abundance of gas and fire protection classes. "Air protection" exercises are taking place nightly in different districts of the capital.

A huge excavation is being carried out in the centre of Berlin. It is generally believed that huge garages are being built there to serve as places in peace time, and as an air protection for high Government officials in the event of war. One hotel in Munich advertises an air protection cellar among its modern conveniences.

## Royal Empire Medal

Sir Wilfred Grenfell Is Honored As Distinguished Benefactor

The council of the Royal Empire Society recently awarded its gold medal to Sir Wilfred Grenfell, Labrador's distinguished benefactor.

The award was made in recognition of his services to the empire and the welfare of his book, "The Romance of Labrador."

"In addition to his work on behalf of Labrador, Sir Wilfred is well known in the world of medicine," said the council. "His work for the people in the land of his adoption has made him one of the pioneers of the empire."

## Little Helps For This Week

"Enter thou into the joy of thy Lord." Matthew 25:23.

"Serving the Lord, rejoicing in hope." Romans 11:12.

If our love were but more simple, So, it would be like His will; And our lives would be all sunshine in the sweetness of our Lord.

What would it be to love a Being absolutely lovely, to be able to give our whole existence, every thought, every act, every desire to the adored One. To know that He accepts it all, and loves us in return as only God can love. This happiness grows forever. The larger our nature becomes, the wider our scope of thought, the stronger our will, and the more fervent our affections. Every sacrifice resolved on opens wide the gate, every sacrifice accomplished is a step towards the paradise within. So, it will be no transitory glimpse, no rapture of a day to be followed by clouds and coldness. Let us labor, and pray, and wait, and the intervals of human frailty shall grow shorter and less dark, the days of our delight in God longer and brighter, till at last life shall mount but His love, our eyes shall never grow dim, His smile never turn away.

## Alberta Cattle Shipped To States

An \$8,000 consignment of high-grade Alberta cattle has been shipped to Washington and Oregon to create new blood in cattle in United States drought areas where many of the better class animals have been killed off, it was announced at Calgary. The shipment contained many prize-winning animals and a top price of \$185 was received. It was reported.

## Share For Everyone

There is no reason to do it if we are willing to do it, and do not insist on doing something else. Many think there is nothing for them to do because they are more eager to choose their work than to do it. There is a share of life for every one; there is work for every hand.

## "WOULD NOT BE WITHOUT SAKSAL"

Says Regine Womak  
Indigestion Gone, Can Eat Anything

Read this letter: "For several years I had been troubled with indigestion and could eat very few foods which satisfied me. A friend of mine suggested that I try Saksal, which is a natural remedy. I tried it, and now I can eat anything. I would not be without a bottle of Saksal in my home, and I hope others may benefit as I have done when they know of your wonderful remedy in Saksal." Saksal is Nature's own Bile Salts. It is a natural remedy in the blood and in the stomach. It is a natural remedy in all cases of Catarrh, Rheumatism, Liver and Kidney troubles. It is a natural remedy in all cases of Catarrh, Rheumatism, Liver and Kidney troubles. It is a natural remedy in all cases of Catarrh, Rheumatism, Liver and Kidney troubles.

Thursday, June 13th, 1935

Mrs. W. Leach, is entertaining  
one of her sisters here.

Mrs. S. G. Clarkson arrived  
in town from Kindsley, on  
Saturday.

T. Rowles, Mr. and Mrs. D.  
McEachern, were the guests of  
Dr. and Mrs. Caldwell, at Cabri-  
Nask, over the week end.

Norman Chell, entrained on  
Monday on a visit to England to  
his mother, who is in feeble  
health and getting on in years.  
Mrs. Chell accompanied him as  
far as Swift Current.

Mrs. Barwise, of Innisfail,  
who has been visiting here with  
her daughter, Mrs. F. Sitley  
and family, left on Monday for  
Abbey, on a visit to a daughter  
and family there.

The Women's Missionary So-  
ciety will meet at the home of  
Mrs. Gordon Longmuir, on  
Wednesday afternoon, June 19,  
at 3 o'clock.

Const. Dunlop, R.C.M.P., was  
called to Regina, this week in  
connection with other members  
of the force to stop the march  
of unemployed to Ottawa.

Attention of readers is drawn  
to the "notice" contained in this  
issue, signed by the Village  
Council. Read it carefully,  
then do your best to help co-  
operate with the medical health  
officer.

Joe and Bill Matz and Mrs.  
F. Pawlak, and daughter, Rose-  
marie, arrived back from Little  
Falls, Minn., on Saturday,  
where they had been attending  
the funeral service of their moth-  
er.

#### A Good Question and A Good Answer

At a Press Conference in  
Washington on June 7, Robert  
Gronie, editor of the *Yanooor*,  
er Sun, put the following ques-  
tion to President Roosevelt:  
"What would you say was the  
Social objective of the Admin-  
istration?"

The President's reply was:

Dr. A. K. McNeill  
(Dr. D. N. MacCharles)

Physician and  
Surgeon  
Phone 44

Office . . . Centre Street

#### DENTIST

Patronize Your Local Butcher

The social objective of the ad-  
ministration is . . . to do what  
any honest government of any  
country would do; to give  
them more of the good  
things of life; to give them  
of wealth in the wider  
terms; to give them places to  
go in the summer time—re-  
creation; to give them assur-  
ance that they are not going  
to starve . . . to give honest busi-  
ness a chance to go ahead and  
make a reasonable profit, and  
to give everyone a chance to  
earn a living."

When the question was asked  
several correspondents used  
to routine and concrete queries,  
laughed, but Mr. Roosevelt was  
entirely serious, and without an  
instant's hesitation defined his  
social credo.

We venture to say that if all  
our legislative assemblies had  
the words of this question, so  
placed in bold type in the legis-  
lative chamber, where they  
could be easily read by all mem-  
bers, it might help them to  
realize the primary essentials  
of good government and help  
them to legislate for progress  
and betterment of the rank and  
file. Empty vapors of over  
technicalities of constitutions  
and old laws for selfish inter-  
ests might be checked. Presi-  
dent Roosevelt's reply to the  
question is also worthy of study  
by the ardent party member.

Ottawa

June 7th, 1935

The Minister of Finance in-  
troduced the Budget resolutions  
this week and they passed thro-  
ugh the House rapidly. There  
are only a very few changes  
being made in the Custom du-  
ties this year, and all the taxes  
such as the 6 p.c. sales tax and  
the 3 p.c. special excise tax will  
remain in operation. In 1930  
the tariff was increased on 106  
articles, in 1931 on 129 articles  
and in 1932 on 138 articles, but

this year no changes were made.  
Mr. Rhodes, the Minister, is  
clearly and obviously in poor  
health, and in recognition of  
this fact, there was no prolong-  
ed questioning or discussion on  
the resolutions.

There will be no change in  
the price of government annu-  
ties. These have been on the  
market ever since the days of  
Sir Wilfrid Laurier, and the  
Minister this week pointed out  
that they were much cheaper in  
price than Insurance Companies  
rates. Every Government  
has been anxious to increase  
the sales as by investing small  
amounts, monthly or yearly,  
any person can provide a retir-  
ing allowance that cannot be  
attacked by any process of law  
and is the safest investment  
available. The Superintendent  
of Annuities, at Ottawa, will  
give full particulars to any one.

As a result of the charges  
made by Mr. Stevens, a group

of men have been conducting  
an inquiry into the Mass buying  
and Price Spreads problems.  
This has cost about half a mil-  
lion dollars as the Solicitor got  
alone \$32,000. Now the long-  
awaited for legislation, based on  
the report, has come down.

The Tariff Board will have  
the power of investigating, re-  
porting on, and advising the  
Government on all questions  
relating to commodity stand-  
ards, and protecting the con-  
sumer generally.

The capital structure of any  
company can be investigated,  
and no shares can be offered to  
the public until the Commis-  
sion is satisfied. However, the  
Company receiving the approval  
of the Commission to sell  
shares may not advertise that  
fact. No attempt is made to  
fix prices although unfair trade  
practices may be investigated.  
If it is considered that these  
trade practices are against some

written law the facts may be  
reported to the Government. A  
Director of prosecutions at a  
salary of \$2,000 a year will be  
appointed to assist and advise  
the Commission.

The Prime Minister is, to all  
appearances, regaining his old  
health and vigor. The tributes  
paid by Mr. Bennett and Mr.  
King to the memory of the late  
Lord Byng, of Vimy, were both

masterpieces. Both were im-  
pressive eloquent, well delivered  
and had the ring of sincerity.  
Both paid tribute to the de-  
ceased's record as a great sold-  
ier, a great Governor-General  
and a great friend of the Veter-  
ans who served under him at  
Vimy and in other fields of con-  
flict.

Sincerely, F. W. Gershaw.

## A LITTLE COMPANY GROWN BIG

IMPERIAL OIL was a little Com-  
pany in 1880. There was then  
only a handful of employees. A  
dozen or so products were the Com-  
pany's stock in trade.

Today nearly 18,000 Canadian men  
and women are engaged in making  
and selling 14 different Imperial Oil  
Products. So, counting their families,  
there are about 90,000 people directly  
dependent for livelihood on this  
Company and its operations. 90,000  
is a lot of Canadians.

Imperial Oil's growth  
depended upon more  
than growth in popu-  
lation and demand.  
Fair dealing, honest  
value and the ability to  
meet new needs with

new products and new services all  
played their part. Of course, a loyal,  
capable staff was indispensable. Such  
a staff was built up by fair and con-  
siderate treatment. Good wages,  
sickness and death benefits, retire-  
ment pensions, group insurance,  
industrial councils—these are some of  
the measures by which the Company  
has recognized its responsibility to the  
men and women in its employ.

These men and women have recog-  
nized in turn their  
responsibility to the  
Company. By loyal,  
whole-hearted service  
they have helped it to  
make better products  
at lower cost and thus  
become "a big  
company."
